RESEARCH INTEREST

Real-World Computer Vision (Action Recognition, Anomaly Detection in CCTV)
Synthetic Data Generation via Generative Models
Edge AI (Resource-Efficient Inference, On-Device Deployment)

EDUCATION

M.S., Electrical Engineering — Mar. 2021 - Feb. 2023
Korea University, Seoul, Korea
Dissertation: Deep Learning Framework Design via Condition Guided Learning
Advisor: Prof. Hanseok Ko (Intelligent Signal Processing Laboratory, ISPL)

B.S., ICT, Multimedia Engineering — Mar. 2015 - Feb. 2021
Baekseok University, Cheonan, Korea
Advisor: Prof. No-Yoon Kwak (Image Processing and Computer Graphics Laboratory, IPCG)
Overall GPA 4.36 / 4.5, Major GPA 4.49 / 4.5

INDUSTRY EXPERIENCE

AI Research Engineer — May 2024 - Present
HDC LABS, Seoul, Korea
Research on CCTV-based vision systems for indoor safety (fire detection, elevator analytics)

AI Research Engineer — Jan. 2023 - May 2024
Metaverse Entertainment, Seoul, Korea
Generative AI for virtual-influencer content (image editing, voice synthesis)

PROJECTS

In-elevator situational awareness Jan. 2025 - Feb. 2026

Built a PoC for in-cab anomaly detection (pet detection, occupancy estimation) that triggered a HDC LABS / HDC Hyundai Industrial Development / Hyundai Elevator three-party MOU. Constructed a domain-specific synthetic + real labelling pipeline and a deployment-automation environment.

Affiliation: HDC LABS

AI fire / smoke detection for underground parking lots May 2024 - Oct. 2025

Designed a synthetic-data pipeline for CCTV-specific fire scenes; trained YOLOv8s + Florence2 VLM detector and migrated to a YOLOv8n + CLIP edge variant for Hailo dual-chip deployment. Demonstrated at Gwangmyeong Central IPARK.

Affiliation: HDC LABS

Designer-facing image generation for virtual influencers Jan. 2023 - May 2024

Curated Stable Diffusion LoRA workflows and a Gradio-based internal UI used for MAVE: / rina.8k content. Researched a two-stage StyleGAN-based face re-aging framework, published in IEEE Access.

Affiliation: Metaverse Entertainment

Expressive multi-speaker TTS Jan. 2022 - Dec. 2022

Built reference-audio-conditioned emotion control model for reading-style / dialog-style TTS (MOS +5%, Similarity-MOS +11% over baseline, n=30).

Funding: Deep Machine Laboratory (DMLAB)

Generative virtual earthquake scenarios for the Korean Peninsula Jan. 2021 - Dec. 2021

Built a GAN-based generator and verification pipeline producing M ≥ 3.0 seismic waveforms; delivered a scenario-authoring software to KMA.

Funding: Korea Meteorological Administration (KMA)

PATENTS

13 KR patents granted, 4 patent applications in progress (3 KR + 1 US) 2024 - 2026

Topics include fire detection in enclosed environments, in-elevator pet / occupancy analytics, construction-site hazard detection, domain-specific synthetic data generation, personalized object tracking, and AI-driven home agents.

See stillrot.github.io/#patents for the full list.

ACADEMIC SERVICE

Reviewer (peer-review)

ICIP 2026; ICBINB @ ICLR 2026; TAG @ CoRL 2026

Instructor, K-Digital Training | HDC LABS 2025 - 2026

Generative AI for Analytics and Service Development

GRANTS & AWARDS

Best Paper Presentation Award 2020

Korea Multimedia Society (KMS) Summer Annual Conference

Best Paper Award 2019

Joint Conference of Korea Digital Contents Society (KDCS) and Korea Institute of Information Technology (KIIT)

Gold Prize, Undergraduate Paper Competition 2019

KIIT / KDCS Joint Summer Conference

Encouragement Award 2019

Korean Institute of Communications and Information Sciences (KICS) Winter Annual Conference
